Title: “The Architectural Standard of Care & Managing Project Risk”

Synopsis: With more and more project claims ending up in court in this emerging post-COVID environment, proper risk management has never been more important.

Objectives:

1. Learn the standard contract terms that every architect should know;
2. Learn how to best mitigate risk & protect your practice when negotiating the contract;
3. Understanding the architectural standard of care: What it is and what it means; and
4. Identify common “red flags” during the project and strategies to address them.
