ABOUT 3C-REN

The Tri-County Regional Energy Network (3C-REN) is a collaboration among California Central Coast local government agencies, the Counties of Ventura, Santa Barbara, and San Luis Obispo, who have partnered to design and deliver customized energy efficiency (EE) programs. Filling EE service gaps and meeting local resident and building professionals needs is the primary focus of the 3C-REN Workforce Education and Training (WE&T) program. The 3C-REN’s success pivots on providing learning and development opportunities to support its local building professional workforce.
